Each fund's year-end income dividend will include net income for the full calendar year, so the amounts shown above will increase by any net income earned in December.

The estimated QDI percentages represent the portion of total 2017 income dividends expected to qualify for reduced tax rates for 2017.

All investing is subject to risk, including the possible loss of the money you invest.

The performance data shown represent past performance, which is not a guarantee of future results. Investment returns and principal value will fluctuate, so investors' shares, when sold, may be worth more or less than their original cost. Current performance may be lower or higher than the performance data cited. For performance data current to the most recent month-end, visit vanguard.com/performance.
